TITLE: Roasting/frying product - contg. molasses,  
cedar-oil, cedar oil cake as  
filler, vanillin, and sugar, giving dietetic prod. with  
anti-sclerotic  
properties

INVENTOR: DUNIN, M S; FEDOROVA, I V ; FILIPPOV, A T

PATENT-ASSIGNEE: ALTAI SCI PRODN ASSOC[ALTAR]

ABSTRACTED-PUB-NO: RU 2000704C

BASIC-ABSTRACT: Ingredients include (in wt.%):- molasses -  
0.125; cedar oil -  
0.1-3.35; cedar oil cake (as filler) - 24.64-28; vanillin -  
0.001-0.02; and  
sugar - remainder, typically 71.909-46.88.

The cedar oil is a technical/flavouring additive possessing  
not a strong  
flavour, but imparting plasticity to the roasting oil. It  
is added in free  
form and contains the cedar oil cake, which also includes  
proteins, vitamins A,  
B, D, E, amino-acids and microelements . It also has  
unsatd. acids which

gives the roasting medium anti-sclerotic properties. The cedar oil cake (prepd. from cedar cones) gives a dietetic prod. with new flavour qualities, reduced calorie-values and fat content.

USE/ADVANTAGE - Used in food (confectionary) industry, particularly an eastern type of roasting agent, with dietetic/antisclerotic properties.  
Bul.37-38/15.10.93
